## AIR CARE SYSTEMS

### 100% Organic & Recyclable

The V-Air® SOLID cartridge, is uniquely constructed from ceramic, infused with high quality perfumes, then complemented by an integrated internal fragrance core. These combine and diffuse powerful key fragrance notes that are subtly different. The diffusion rate of fragrance moving through the ceramic capsule is much different to the fragrance evaporating from the fragrance core.

---

VOC exempt. V-Air Solid is completely free of any solvents, propellants, HFCs and harmful volatile organic compounds (VOCs)

No batteries required. All it needs to work is natural airflow. The refill is 100% organic and biodegradable and the dispenser is 100% recyclable.

Sub-micron technology. V-air solid particles enable superior fragrance delivery yet are sized typically 1.0 micron. This means they are much smaller and lighter than the particles in other fragrance systems, remaining airborne for many hours.

# Compact & Stylish

Omniscent

PROGRAMMABLE

Airoma available in  
White/Chrome and Black/Chrome

Our freshening fragrance delivery systems can be used in conjunction with air cleaning systems and will guarantee a pleasant and fresh washroom or office environment. The range comprises of compact and stylish units which are suitable for an array of different locations. Available in a selection of finishes they will enhance any room decor. Our units are installed and regularly serviced by our highly trained service operatives; changing fragrances and batteries.

---

Totally discreet and professional service provided in situ.

Compact stylish dispensers.

Choice of White/Chrome and Black/Chrome.

Variety of unique refreshing fragrances.

Fully programmable to ensure maximum efficiency.

Fragrance intensity control.

Large space fragrancing battery operated or mains fed.

# AIR PURIFICATION SYSTEM

## A breath of fresh air...

The Airsteril washroom units utilise our unique combination of 5 technologies. They eliminate unpleasant washroom odours and control harmful bacteria and viruses both in the air and on all exposed surfaces 24 hours a day, 365 days of the year.

Providing a green solution that ensures the washroom is hygienic and odour free for all users. The technology used in each unit can be adjusted to deal with varying levels of contamination.

Air Steril WR30/WRX

**Dimensions:** W140mm H100mm L448-470mm

**Construction:** Anodised Aluminium Solid Extrusion

**Power Supply:** 100 - 240v 13-17 watts

**Weight:** 1.5kg

**Operation:** Continuous indicated by blue lamp.  
Requires annual lamp change.

**AIRsteril**   
infection & odour free environment

## AIR STERIL THERMAL UNIT

Air Steril-Washroom Thermal

**Dimensions:** W125mm H90mm L400mm

**Construction:** Polycarbonate UL94 V2 Moulding  
**Power Supply:** 220V - 50Hz 9 watts (via switched fused spur)

**Weight:** 0.9kg

**Operation:** Continuous indicated by blue lamp.  
Requires annual lamp change.

...it couldn't be simpler

Provides elimination of washroom odours

Guarantees to kill at least 98.8% of airborne bacteria in the air - 24/7

Guarantees to eliminate bacteria on surfaces such as basins, taps, urinals, door handles and mirrors

Controls airborne and surface infections for all users

Suits small to medium enclosed space (10m<sup>2</sup> to 30m<sup>2</sup>)

Ideal for disabled facilities, restaurants, medium sized offices, sluice rooms, baby changing, changing rooms, public houses, care homes, petrol stations or any washroom with medium footfall.

Low power usage

Only system certified by the health Protection Agency

# HAND CARE SYSTEMS

Replace with IntelliCare Hand Wash Systems  
(Foam, Liquid, Gel or Cream in the same dispenser)

## W/C & URINAL SANITISING SYSTEMS

### Effective & simple solution

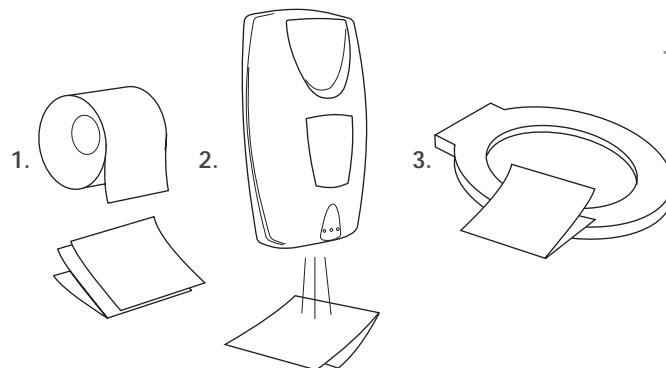

The Safeseat® MVP Surface Sanitiser Dispenser provides the individual with the opportunity to clean and sanitize surfaces effectively before use.

The Safeseat® MVP formulation is ultra quick drying and effective against all harmful bacteria commonly found on and around toilet fixtures as well as other surface areas (including baby changing units). To use, simply spray onto toilet tissue or cloth and wipe around the affected area. Specially sealed pouches ensure installation of refills is quick, simple and contamination free.

The Safeseat® MVP dispenser is available in White/Chrome and Black/Chrome

The Safeseat® MVP Surface Cleaner

## AUTOMATIC SANITISING SYSTEM

Specifically for use in WCs and urinals the Quadrasan® ensures fixtures remain clean sanitised and odour free through a continued programmed delivery of chemical.

With an ultra-modern design, the highly effective Quadrasan® is designed to work in a variety of locations without disrupting the surrounding environment.

◆ Clean WCs 24 hrs a day,  
7 days a week,  
365 days per annum

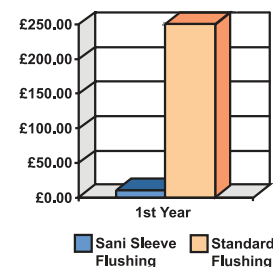

# URINAL MAINTENANCE SYSTEMS

## Cuts your water bill 96%

And solves your urinal problems

A urinal flushing every 15 minutes will use up to 157,680 litres of water per annum at an average cost of £500. A urinal fitted with the Sani-Sleeve water controller will use 6,570 litres of water per annum at an average cost of £10.

- New slimline design.
- Quick and easy to install.
- Tamper-proof technology
- Works on standard PP3 battery - no need for mains supply.
- Reduces urinal flushing to 4 flushes per day.
- Fail-safe design features.

## Say no to odour blockages hygiene

The Sani-Sleeve is a low cost consumable and can be retro-fitted to existing as well as new urinals. It's odour locking design lines the foul smelling internal surface of the waste outlet and trap, Sani-Sleeve units are replaced quarterly to ensure that the bio enzymes that line the sleeve continue to work well. The new caps maintain a high standard of appearance and improve hygiene.

## WHY LOTUS PRO?

### Changing the way the world cleans

- **Powerful** - more effective than bleach and over 50% stronger
- **Cost saving** - Save up to 50% vs using chemicals
- **Environmentally responsible** - Breaks down to water and oxygen once it's finished working
- **Safe** - Non irritant, non caustic, no allergy concerns and antimicrobial
- **The smart choice** - For your staff and customers - improved customer satisfaction, no personal protective equipment - one solution for all needs.

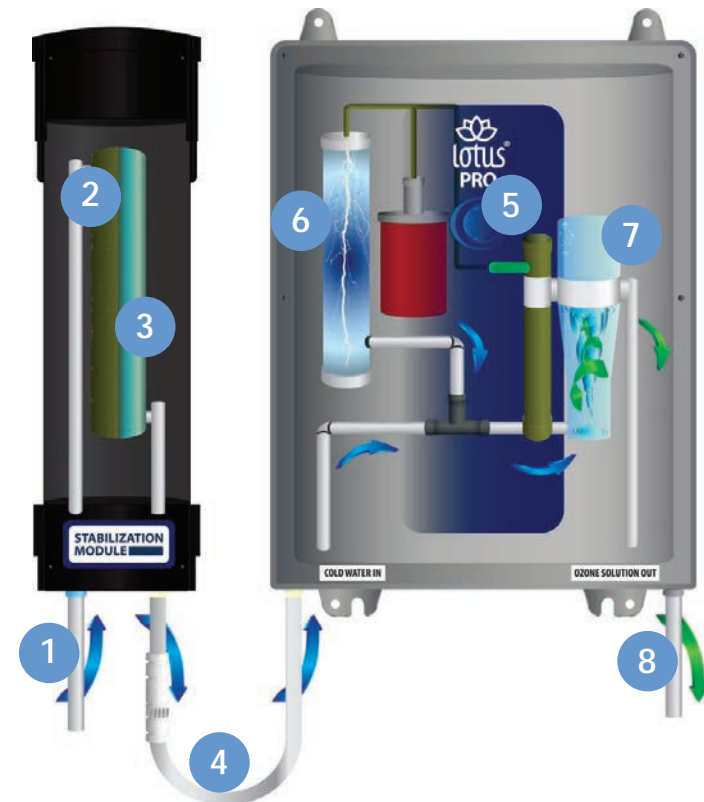

SANITISING  
UP TO  
**24 hrs\***

### How it works

- 1 Cold tap water enters the lotus PRO stabilization Module.
- 2 The lotus PRO Stabilization Module mixes with the cold tap water stream, expanding the cleaning time upto 24 hours.
- 3 Treated water leaves the lotus PRO stabilization Module
- 4 Water passes through the FloJet connector, which prevents back flow with air lock, then enters the lotus PRO High Capacity Unit.
- 5 Oxygen enters the dispenser through the replaceable filter cartridge.
- 6 4,500 volts of electricity transforms  $O_2$  to  $O_3$
- 7 Ozone gas that is not saturated in the water is separated and safely dispensed as oxygen.
- 8 Aqueous ozone leaves the dispenser to fill mop buckets, trigger sprayers, auto scrubbers and carpet extractors.

#### TECHNICAL INFORMATION

- **DIMENSIONS:** 57cm X 47cm X 25cm • **FLOW:** Continuous flow Up to 12 litres/min 30 min. shut off safety feature
- **POWER:** 220v • **SANITISING TIME:** Up to 4 hours • **CLEANING TIME:** Up to 4 hours • **CARTRIDGE LIFE:** 6,500 litres

# URINAL MAINTENANCE SYSTEMS

## Sensaflush

Sensaflush is a unique urinal flush management system designed to drastically reduce water consumption by eliminating unnecessary and expensive wastage.

- Incorporated into urinal cistern water supply.
- Only allows flushing when user is detected.
- Urinals flushed 30 minutes after activation.
- If no detection within 12 hours a sanitizing flush is provided.

Sensaflush

1. Activated by user presence, 30 minute wait period commences
2. During 30 minute wait period all further user presence ignored
3. After 30 minutes the cistern is fast filled and urinals flushed

Biosolve

## Biosolve

Biosolve Purge is designed to unblock urinals and shower cubicles instantly by breaking down organic waste, releasing enzymes and re-opening the pipe. You will see immediate improvements after treatment.

V-screen

## V-screen

V-Screen® fits over the drain or urinal and acts as a net to catch debris such as chewing gum, cigarettes, paper and other refuse. It also combats odour control between washroom cleaning visits. V-Screen® is VOC exempt and non-hazardous. A pleasant fragrance is provided, keeping the urinal smelling fresh for up to 30 days.

# MEDICAL SYSTEMS

## Effective simple solution

Ideal for use in surgeries, hospitals and first-aid rooms, this range of services provides for the safe and hygienic disposal of all sharps, medical and clinical waste. Importantly too, our units are distinctive in appearance, fully secure and tested to meet BS7320:1990. Combined with our own high quality service standards, this ensures full compliance with all legislative requirements.

All sharps bins are clearly marked with relevant warnings for safe usage. It is imperative that all clinical blades, broken glass, syringes and needles etc. are disposed of safely and this system meets all these requirements.

It is a requirement of the law that all employers are legally bound to make first aid provision for all employees. Shorrock Trichem's first aid systems enable you to comply with the requirements of the 1990 Approved Code of Practise to the Health and Safety First Aid Regulations with the most advanced development in such systems. All our dispensers can be wall mounted or free standing which makes the system more portable and convenient to use. The impressive streamline design also prevents dust getting into the products thus eliminating product contamination.

# BABY CARE SYSTEMS

## Home from home

Away from home, the communal washroom is often the only available location in which to change the baby's nappy. Where designated changing facilities are not provided, undertaking the task can be difficult, unhygienic and potentially dangerous.

Installing a changing station provides parents with a safe, convenient and hygienic changing facility in non-domestic washrooms and is now considered to be equally important as the provision of other essential facilities.

Along with a high quality nappy disposal service which ensures compliance with all legislative requirements, the installation of changing stations demonstrates a commitment to visitor and customer care and improves the perceived quality of an establishment.

This complete service provides a rigid 45 Litre unit, fully lined, containing a vaporising disinfecting/deodorising fluid enabling bacteria and malodours to be eliminated at source.

# HAND DRYING SYSTEMS

## Innovation and luxury

VELTIA® an innovative hand dryer that operates without a heating element. Operates automatically when putting your hands in the drying chamber and works based on high speed air, drying hands in a very short time, leaving on the skin a nice feeling of a massage.

Besides a great effectiveness, VELTIA® includes a bad scents elimination system thanks to ZEROSMELL® (sold separately).

VELTIA® is ideal for washrooms with medium and high number of users per day

### VELTIA® Features and Benefit

# Quietly does it

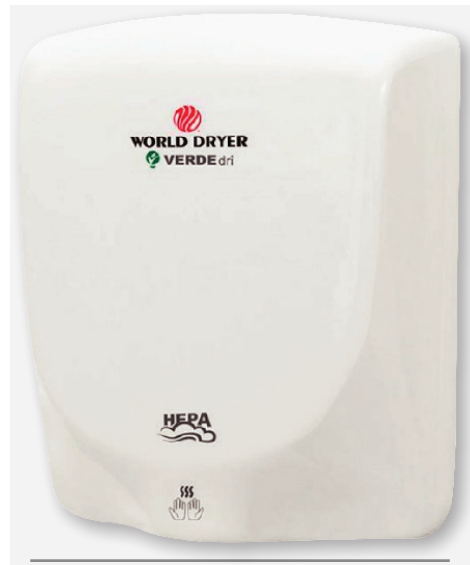

## Classic+Mk11

Classic + Mk II  
Available in White, Polished Chrome  
and Black

Aluminium Matte

VERDEdri™  
Available in White and  
Polished Chrome

The Classic+ Mk II is the first fast-dry hand dryer to be awarded the Noise Abatement Society's Quiet Mark. The Classic+ Mk II is a hand dryer with exceptional drying performance - the ultimate in modern, efficient washroom hand dryers, and with an average life cycle of >6,000 hours, it's perfect for all high traffic applications.

## VERDEdri™

VERDEdri™ is a high speed, surface-mounted ADA compliant (protrudes from the wall 100mm or less) hand dryer featuring HEPA filtration system and antimicrobial technology.

VERDEdri is extremely energy efficient utilizing only 950 watts of power. The adjustable two speed motor controls and global universal voltage features accommodate any commercial washroom environment.

VERDEdri was designed to be durable and vandal resistant, to cope with all environments and footfall situations. The user is given added protection and comfort as VERDEdri incorporates SteriTouch® antimicrobial technology inhibiting the growth of bacteria, mould and fungus extending the dryer's service life.

# HAND DRYING SYSTEMS

## Storm

Over time washrooms have become smaller spaces, the Storm gives you the performance you need to dry your hands whilst only taking up a small footprint on the wall.

Dependant on ambient temperature, the Storm makes use of its energy saving motor by only using it's heater element when necessary giving you the user a balance of pleasant hand drying and constant energy conservation.

Within the Storm is a UV light which acts as an internal UV steriliser system. This means that while the unit requires cleaning outside, the inside is taken care of.

## Tornado Ultra Dri

Designed to provide a cost effective alternative to hand drying the new Tornado Dryer has been developed with speed in mind. It provides a rapid drying time of 10-12 seconds, almost half of a conventional dryer, reducing up to 70% energy saving.

The unique design boasts a range of additional features which make the product suitable for almost any application. The heater elements can be set to between 450 and 900 W, enabling the unit to be used in a variety of washroom applications from schools to construction sites. Another feature is the blue led which provides a visible indication of the drying zone ensuring that the user's hands are always in the warm air stream.

# DUST MAT SYSTEMS

## Welcome in

Research proves that up to 80% of dust, dirt and grime in the workplace is actually 'walked in' from outside. With our dust control professional mat service you can prevent 85% of the soiling that is walked into the workplace.

Dust mat systems can help prevent slips, trips and falls at work by making the floors dryer and less slippery. Prevent dirt and moisture from being tracked into (and around) the building, protecting flooring from soiling and permanent damage. Dust mat systems also help to create a smarter, safer working environment.

All our mats are professionally Laundered and exchanged with fresh clean mats every fortnight by our team of service personnel, so your floors are never left unprotected.

- Premier mat systems.
- Logo mat systems.
- Anti-Fatigue mat systems.
- Wet area and kitchen mat systems.
- Guaranteed service levels.
- Free installation and guaranteed
- Priority Service Visits.
- Flexible payment options, including Direct Debit payment facility.

# A solution for every environment

## Premier Mats

- LOGOWALK professional mat systems can prevent 85% of the soiling that is walked into the workplace.
- Prevents Slips & Trips improving Health & Safety in the workplace.
- Reduces cleaning costs.
- Extends the life of your high cost flooring.
- Mats are professionally cleaned and exchanged on a regular basis.

## Wet area & Kitchen Mats

- The Wet area & Kitchen mat systems are the first commercially launderable kitchen mats featuring both anti-fatigue and antimicrobial properties.
- The resilient nitrile rubber construction reduces fatigue of long-standing jobs.
- The Anti-slip mat is water, oil, grease and solvent resistant, ideal for kitchens and bars while specially placed holes allow drainage.

## Logo Mats

- Logo Mats create impact by marketing and promoting your company image.
- Effective branding displaying company logo & corporate colours.
- Protects flooring.

## Anti-Fatigue Mats

- 80% of the people that work in a standing upright position suffer from problems with their legs and/or back, an anti-fatigue mat is the best and simplest way to reduce or even avoid these problems.
- The Anti-fatigue mat is water, oil and solvent resistant, ideal for an anti-slip mat in industrial areas.
- Reduces fatigue and noise.

## Also available:

- Scraper Mats
